**425 Hurlingame Avenue  
Redwood City, Ca 94063**

**Mr. Paul Carrick:**

I want to congratulate you for your implementation and completion of the FAR 145 FAA Certification and the AS9110 Quality System implementation. As you are aware, the completion of your implementation plan and the passing of the FAR 145 FAA Quality System and the implementation of the AS9110 Quality System allows you to indicate that all applicable ISO9001:2008 and AS9110 quality system requirements have been implemented. Maintaining the discipline, systems, improvements, training, and quality requirements of the FAR 145 and AS9110 quality system, and your customer requirements will be a continuous project.

AS9110 is the recognized Aerospace Quality Standard for the Quality Maintenance Systems Requirements for Maintenance Organizations in the Aerospace Industry

The acceptance of your quality system as documented by the completion and acceptance of the FAA, Internal Audit and supported by the objective evidence on file will allow you to note the "Compliant to ISO9001:2008 and/or AS9110", and/or FAR 145 on customer survey forms. You must not allow your quality system to become non-conforming, nor deviate from the documented procedures established. Improvements are to be noted and documented for procedural changes.

A follow-up internal audit is scheduled for the third Quarter of 2011. The current internal audit will be submitted to all customers requiring objective evidence of compliance.

The following companies use and have approved audits performed by QA Services. JPL, Boeing, Honeywell, Lockheed Martin, Raytheon, Triumph Aerospace, Northrop, Pratt & Whitney, Aircraft Hinge, Frazier Aviation, Clarke Engineering, , Advance Measurement Labs, CMM Technology, Dimensional Inspection Labs, Intel, US Govt., A2LA, Nadcap, PRI, Perry Johnson, Lobart Engineering, Aerotec Alloys, Lockheed Martin, Dowell Aluminum Casting, LSMP, United Aeronautical and many more, If your commodity is needed by a company using our database, they will note your AS9110, FAR 145, and ISO9001:2008 compliance record.

Once again congratulations for your hard work and the company's compliance to the FAR 145, and AS9110 Quality system requirements.

**Sincerely**

*Jose C. Collado*
